

SCHEDULED CASTE SUB PLAN

The schedule caste sub plan (SCSP) for the sub sector of water supply envisages to provide drinking water facilities to schedule caste localities in rural areas.

There is 35,92,715 SC population in the Gujarat State, which is 7.1% of the total population of the State. Provision of funds is made in proportion to the SC population.

Under the SCSP, the water supply facilities are provided in the form of hand pump and piped water supply scheme, according to the requirement from village water supply scheme, pipeline is extended and water supply components like under ground sump, stand post, cattle trough are constructed and elevated service reservoirs are also constructed where technically needed to get the water with adequate pressure.
